PROFESSIONAL PROFILE

Full Stack Web Developer with experience in end-to-end applications. Currently studying Computer Engineering (Gastón Dachary University). I excel in self-management, teamwork, and rapid learning. I have led projects that improved internal processes and user experience.

FEATURED PROJECTS

Full Stack Developer – Wanna Colive (Coliving Startup, Argentina)

Aug. 2025 – Nov. 2025

Internship Contract – Remote Work

- I developed a full stack application from scratch for internal management of the startup, using **Next.js** on the frontend and **NestJS** (Express) on backend with **TypeScript**.
- I designed and modeled the database in **PostgreSQL**; I optimized queries and ensured data integrity.
- I implemented critical modules: user **authentication** (with roles and permissions) and sending transactional emails.
- I developed key functionalities: a news module with a rich HTML editor, contract management, and ticket/complaint system.
- I managed requirements with stakeholders, planned tasks, documented development, and presented progress reports in follow-up meetings.

Technologies: Next.js, React, TypeScript, NestJS, Express, PostgreSQL, JWT, Docker, Render.

Database: PostgreSQL.

Full Stack Developer (Academic Project)– Servicios Libres

Jun. 2025 – Jul. 2025

- I participated in a team to create a web platform (final bootcamp project) with functionalities of User authentication, online payments, internal messaging, and custom profiles.
- I implemented email notifications using **Nodemailer** and user registration flows.
- I integrated the **MercadoPago** payment gateway for secure service transactions.
- I developed dynamic frontend forms (Next.js, TailwindCSS) for content uploading/editing, improving the UX

Technologies: Next.js, React, TypeScript, TailwindCSS, NextAuth, Axios, NestJS, Express, PostgreSQL, TypeORM, JWT, Socket.io, Nodemailer, Swagger, Stripe, MercadoPago.

PROFESSIONAL EXPERIENCE

Python Developer

Jan 2022 - Present.

IPS (Social Security Institute of Misiones)

- I replaced an outdated Visual Basic system with a new **Python** application that streamlined administrative processes and improved the efficiency of internal procedures.
- I collaborated with non-technical users to adapt the tool to their workflows, ensuring a successful implementation. successful.
- I maintained and optimized the system according to new requirements, integrating continuous improvements based on feedback from users.

TECHNOLOGIES:

Programming Languages: JavaScript, TypeScript, Python.

Frameworks & Libraries: React.js, Nest.js, Express.js, Node.js.

Databases: PostgreSQL, MongoDB.

Tools: Git, Docker, Render, Slack.

Agile Methodologies: Scrum, Agile.

EDUCATION

- Full Stack Web Developer - Soy Henry Bootcamp (Feb 2025 – Jul 2025)
- Bachelor's Degree in Computer Engineering - Universidad Gastón Dachary (Jan. 2020 – Present)

ADDITIONAL EDUCATION

- ChatGPT Prompt Engineering for Developers – OpenAI. (Jul. 2024) - [Certificado](#)
- Python 3 Plus: Python desde Cero + Data Analysis y Matplot – Udemy. (Oct. 2021) - [Certificado](#)

LANGUAGES

- Spanish: Native
 - Inglés: Nivel intermedio-alto (B2 – Cambridge First Certificate)
-
