## PROFILE

I am a Full Stack Web Developer with a strong focus on Back-End development and an advanced student of Computer Engineering. I began my professional journey as a self-taught developer, where I successfully modernized a legacy data management system by replacing it with a Python + Tkinter application, significantly reducing administrative time and improving collaboration with non-technical areas. Later, I joined the SoyHenry bootcamp, where I consolidated my technical skills and strengthened teamwork through real-world projects. I am motivated by solving complex challenges, designing scalable solutions, and contributing with analytical thinking. I hold a certified B2 English level (FCE) and maintain a proactive attitude toward continuous learning.

## PROJECTS

### Full Stack Web Developer – Servicios Libres

Jun. 2025 – Jul. 2025

Experiencia académica – Henry Bootcamp

A full-stack web application developed collaboratively as a final bootcamp project. *Servicios Libres* connects users with freelance professionals in a simple and efficient way, integrating authentication, payments, messaging, and profile management features.

- Implemented the email notification system using Nodemailer to manage registration and contact workflows.
- Integrated MercadoPago as the payment gateway, enabling secure and dynamic transactions within the platform.
- Developed dynamic service forms on the frontend to handle service creation and editing, ensuring a seamless user experience.

Front: Next.js, React, TypeScript, TailwindCSS, NextAuth, Axios.

Back: Nest.js, TypeScript, PostgreSQL, TypeORM, JWT, Socket.io, Nodemailer, Swagger, Stripe, MercadoPago, Postgres.

## PROFESSIONAL EXPERIENCE

### Python Developer

Ene 2022 - Present.

IPS (Instituto de Previsional Social de Misiones)

- Replaced an outdated Visual Basic system with a new application built in Python (Tkinter + SQL), significantly reducing administrative time and improving internal processes
- Collaborated with non-technical users to adapt the tool to their workflows, ensuring successful implementation.
- Maintained and optimized the system based on feedback and evolving needs after deployment.

## TECHNOLOGIES:

**Programming Languages:** JavaScript, TypeScript, Python

**Frameworks & Libraries:** React.js, Nest.js, Express.js, Node.js

**Databases:** PostgreSQL, MongoDB

**Tools:** Git, Slack

**Agile Methodologies:** Scrum

## EDUCATION

- Full Stack Web Developer - Soy Henry Bootcamp - Feb 2025 – Jul 2025
- Bachelor's Degree in Computer Engineering - Universidad Gastón Dachary – Ene 2020 - Present

## ADDITIONAL EDUCATION

- ChatGPT Prompt Engineering for Developers – OpenAI. Jul. 2024 - [Certificado](#)
- Python 3 Plus: Python desde Cero + Data Analysis y Matplot – Udemy. Oct. 2021 - [Certificado](#)

## LANGUAGES

- Inglés: Nivel intermedio-alto (B2 – Cambridge First Certificate)
  - Spanish: Native
-
